

GREEN PEPE SCULPTURAL MARBLE TABLE LAMP AT TRATTORIA ALTRA VISTA

Holy Luz collection • Salone del Mobile 2026

Designed by marble atelier **on•entropy**, **Green Pepe** is a sculptural, glowing table lamp from the **Holy Luz** collection. It draws inspiration from the bioluminescence of *Mycena chlorophos*, a rare mushroom species found in subtropical Asia and Japan.

Green Pepe makes its debut at **Trattoria Altra Vista con Sala Giochi**, curated by **Anotherview**, at **5VIE Milan Design District 2026**. Conceived in line with on•entropy's motto, "**design for the mind and the senses**," Green Pepe resonates with this year's 5VIE theme, **Qualia of Things**: the subjective and qualitative aspects of conscious experience, or what it feels like to perceive something.

In this context, Green Pepe highlights the inner **luminosity** and reflective presence of **marble**. Capturing and diffusing softened light, it encourages a contemplative experience—one that extends beyond sensory perception and **invites people** to gather around it.
